#### Phase 1: Removing diamonds wireless configuration

- 1. Open System Preferences and go to the "Network" preferences pane
- 2. Click the "Turn AirPort Off" button
- 3. Click the "Advanced..." button

For support contact the DHTS Service Desk at 684-2243 or https://duke.service-now.com

- 4. Under the "AirPort" tab, find and select/highlight "diamonds" in the list of "Preferred Networks"
- 5. Click the minus button to remove it from the list

For support contact the DHTS Service Desk at 684-2243 or https://duke.service-now.com

- 6. Click on the "802.1X" tab
- 7. Select any and all entries in the list on the left and remove them using the minus button

- 8. Click the "OK" button
- 9. Click the "Apply" button
- 10. Quit System Preferences by clicking on the red close button in the upper left-hand corner of the window

For support contact the DHTS Service Desk at 684-2243 or https://duke.service-now.com

- 11. Go to Spotlight (upper right-hand corner of the menu bar, the icon looks like a magnifying glass) and type in "Keychain Access"
- 12. Click on the Keychain Access application to run it

13. In the "Keychain Access" application, under the "login" keychain, find all entries that have "diamonds" in the name

For support contact the DHTS Service Desk at 684-2243 or https://duke.service-now.com

14. Select them and press the "delete" key on the keyboard to remove them

- 15. Quit the "Keychain Access" application
- 16. Restart the Mac.
